Loved the game, and really enjoyed this ost, simply beautifull.. This game is insane. This is a gem of a war game. Plenty of action or combat to keep you interested and focused.

They should have made a sequel to this one or came out with some DLCs for this one.

This is a game that should have set the standard for the Medal Of Honor,COD and the Battlefield series.

A classic example of what a war game should be.

For those armchair soldiers out there I highly recommend it.. Loved this. Great game/story. About to start the next one.. With the Hellfire update, I highly reccomend this game. The multiplayer aspect this adds is amazing - feels like you really are in the mech. Really hoping the Multiplayer community continues to grow on this one.

Devs - please add the ability to add bots to a match! That would really future proof this game.. This game sucks big donkey balls.. not the worst but close. "early access So it will get better" Alright. A year later its still lackluster and boring, and it hasnt had an update in about a year now. Too late to get a refund, i was screwed over. 10/10 would get ♥♥♥♥♥ed by devs again. I really want to give this game a good review I really do...

BUT, saving is impossible and loading saves equally so.

Autosaves were the only saves that would work for me two days ago, now they don't.

Manual saving never worked.

Loading the autosaves has never worked.

I've not seen many bugs and its never crashed on me, the few bugs I've found were where the dwarves couldn't path out of the tile they were in to do anything and trade caravans stopped coming because the trade area was 'unaccessable' even though I never moved it and it had worked only minutes prior to that event.

I recommend staying away from this game until at least the saving and loading issues have been fixed for good.. Great game and if you like games like Tales of Maj'eyal, Dungeons of Dredmor, or even Desktop Dungeons you should like this. It does things differently when it comes to leveling up with all skills choices open on your first level up and you pick what fits your playstyle and whats happening at the time you level up. It also does health differently with no constant health regen between turns meaning you can only heal from potions and spells. The game has cool levels,enemies, and loot with secrets and portals sprinkled in. At 5\$ you really can't go wrong with this game and the dev already has a good list of things planned. BUT it is EA so you know how that goes but dev seems active and passionate about his game. I recommend this game and if your worried you won't like it there's a demo so you can try before you buy.. I love TD games especially traditional 2D types, so I had to have 300 Dwarves. It is true that it resembles Kingdom Rush, but then again it also resembles the 8Floor games (Royal Defense, Fort Defense, etc.) and loads of other TDs.

I like the graphics and sounds, and basically the game play is ok. But... and it is a BIG but, there is not much strategy in this game. At first I found it incredibly hard, since it didn't seem I could earn money fast enough to build my defenses. The I realised that there was a simple tower strategy, you could apply. That strategy worked for every level in the game except the last. I'm sorry but where is the challenge and fun in that??? If I don't count the hours I spend finding that strategy, I think I finished in 2 hours.

It seems like this game is not very well thought through, and altho it is cute there are much better TDs out there.

---

Couldnt play it for long. Its making me motion sick.. It's more fun to play this game via co-op (it supports up to five players at a time), but is fairly enjoyable as a single player experience. Essentially, it's a cross between a MOBA and tower defense game. It's like the former in the sense that you'll choose a character (there are four characters for each of the four classes, each with different skills) and start at level 1 at the beginning of each match. As you level up, you can put points into your four skills and buy new items to place into your inventory. Instead of fighting other heroes, you'll be fending off waves of enemies (where the tower defense bit comes into play) who are trying to get to your missile silo. As you play a particular class, you'll level them up in a "path of glory" tech-tree/xp tree-esque system which unlocks different buffs and the like. Not as hardcore or complicated as say, "League of Legends", but it scratches that MOBA itch in a pinch.

<https://www.youtube.com/watch?v=Zy5rIFsJSA0>. too all people who want to get this game it is dead and broken so badly i didnt even get a full hour on it.. I am WhiteCoffee and i just buy it yesterday i am enjoying it.Because it have many you can do it you can download Live Wallpaper in Steam WorkShop or you can just make it your own.If you like to share your Live Wallpaper you can just upload it.Just 2 day i already make 3 Live Wallpaper and i like it.Please Sub some of my Live Wallpaper i am sure you will like it.If you still teenage.Haha. To bad it won't run on the newer systems.

It looked like an interesting game.. Point perfect is a rage game where you are a mouse and you have to detroy enemies, defeat bosses, and complete minigames. In the game you begin with 3 classes: Vitality (You start with 3 lives), Utility (Your attacking square gets larger), and Greed (You get points 30 frames quicker than normal). I think it is a good way to waste time on a Saturday morning and will make your mouse skills increase. I give this game a 9/10 rating.. For being an indie game and the low price I strongly recommend it. Player control is trying to simulate "Last Guardian" one, I prefer to play with pad. Low poly style and the ambient music are amazing, I love it. Still in the desert level but wishing to see more :). Now this was a whole lot of fun. A very sylish game and nice easy menus. I liked having the tutorial after I jumped right in first time and didn't really know what I was doing.

There is something wickedly addictive with this game. For some reason there is some sick pleasure in banging those cells together before they go sour. You can have to stay alert because it can all go very pear shaped very quicky just when you think you've got it nailed.

Easy to see that a lot of time and love has gone into this. Nice music, suits the gameplay well. Great job.. This game, is without a doubt, the greatest game ever crated. I felt completely immersed in the life-like graphics, that put even battlefield V to shame. There's no way that this game could've been created by one man, because I feel it is a true labor of love by an entire community. From every aspect this game is incredible, and I highly recommend this to anyone who wants to experience the true thrill of battle.
